Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowance subject matter: the prior art of record does not teach or suggest the combination of light emitting elements on the end of leads arranged on a lead frame as a plurality of pairs in a straight line and at uniform spacing. Immersing the light-emitting elements, bonding wires attached to the elements, and one end of the leads in a light transmitting resin filled respectively into cavities of an envelope jig. Each of the cavities has oblong lateral cross sections by an ellipse and almost U-shaped longitudinal cross section on the lead frame. The long axis of the lateral cross section of the cavities is perpendicular to a lateral straight line as extending through the lead frame in claims 8 and 11.
